The Company currently markets group life and accidental death and dismemberment insurance, group and individual accident and health insurance products, and group dental and group vision insurance in New York through brokers and its own representatives. The accompanying statutory basis financial statements of the Company have been prepared in conformity with accounting practices prescribed or permitted by the New York State Department of Financial Services (“Department”). Only statutory accounting practices so prescribed or permitted by the Department can be used in determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under New York Insurance Law.

The National Association of Insurance Commissioners’ (“NAIC”) Accounting Practices and Procedures manual, (“NAIC SAP”), including the Statements of Statutory Accounting Principles (“SSAP”) as updated by the NAIC, has been adopted with some exceptions by the Department.

Commercial Mortgage Loans

For disclosure purposes, the fair values of commercial mortgage loans were estimated using an option-adjusted discounted cash flow valuation. The valuation includes both observable market inputs and estimated model parameters.

Significant observable inputs to the valuation include:

- Indicative quarter-end pricing for a package of loans similar to those originated by the Company near quarter-end.
- U.S. Government treasury yields.
- Indicative yields from industrial bond issues.
- The contractual terms of nearly every mortgage subject to valuation.

Significant estimated parameters include:

- A liquidity premium that is estimated from historical loan sales and is applied over and above base yields.
- Adjustments in interest rate spread based on an aggregate portfolio loan-to-value ratio, estimated from historical differential yields with respect to loan-to-value ratios.
- Projected prepayment activity.

Valuations for commercial mortgage loans measured at fair value on a nonrecurring basis using significant unobservable Level 3 inputs are sensitive to a number of variables, but are most sensitive to net operating income and the applied capitalization rate. Generally, an increase or decrease resulting from a change in the stabilized net operating income from the collateralized property would result in a directionally similar change in the fair value of the asset. An increase or decrease in the assumption for the capitalization rate would result in a directionally opposite change in the fair value of the asset.

Fixed Maturity Securities

Fixed maturity securities are comprised of the following classes:

- U.S. government bonds.
- U.S. states, territories and possessions.
- U.S. special revenues bonds.
- Industrial and miscellaneous (unaffiliated) bonds.

The fixed maturity securities are diversified across industries, issuers, and maturities. The Company calculates fair values for all classes of fixed maturity securities using valuation techniques described below. They are placed into three levels depending on the valuation technique used to determine the fair value of the securities.

The Company uses an independent pricing service to assist management in determining the fair value of these assets. The pricing service incorporates a variety of information observable in the market in its valuation techniques, including:

- Reported trading prices
- Benchmark yields
- Broker-dealer quotes
- Benchmark securities
- Bids and offers
- Credit ratings
- Relative credit information
- Other reference data

The pricing service also takes into account perceived market movements and sector news, as well as a bond's terms and conditions, including any features specific to that issue that may influence risk, and thus marketability. Depending on the security, the priority of the use of observable market inputs may change as some observable market inputs may not be relevant or additional inputs may be necessary. The Company generally obtains one value from its primary external pricing service. On a case-by-case basis, the Company may obtain further quotes or prices from additional parties as needed.

The pricing service provides quoted market prices when available. Quoted prices are not always available due to bond market inactivity. The pricing service obtains a broker quote when sufficient information, such as security structure or other market information, is not available to produce a valuation. Valuations and quotes obtained from third party commercial pricing services are non-binding and do not represent quotes on which one may execute the disposition of the assets.

The significant unobservable inputs used in the fair value measurement of the reporting entity's bonds are valuations and quotes received from secondary pricing service, analytical reviews and broker quotes. Significant increases or decreases in any of those inputs in isolation would result in a significantly lower or higher fair value measurement. Generally, a change in the assumption used for the pricing evaluation is accompanied by a directionally similar change in the assumption used for the methodologies.

The Company performs control procedures over the external valuations at least quarterly through a combination of procedures that include an evaluation of methodologies used by the pricing service, analytical reviews and performance analysis of the prices against statistics, trends, and secondary pricing sources, back testing of sales activity and maintenance of a list of fixed maturity securities with characteristics that could indicate potential impairment. As necessary, the Company compares prices received from the pricing service to prices independently estimated by the Company utilizing discounted cash flow models or through performing independent valuations of inputs and assumptions similar to those used by the pricing service in order to ensure prices represent a reasonable estimate of fair value. Although the Company does identify differences from time to time as a result of these validation procedures, the Company did not make any significant adjustments as of September 30, 2015 or December 31, 2014.

D. Not Practicable to Estimate Fair Value

The Company did not have any investments where it was not practicable to estimate fair value as of September 30, 2015 or December 31, 2014.

In addition, and subject to certain limitations, either party may terminate the Merger Agreement if the Merger is not consummated by April 25, 2016, which date can be extended by either party until July 25, 2016 in the event of delays in obtaining regulatory approval.
