The Company is also licensed in the District of Columbia, and the U.S. territories of Guam, Puerto Rico and the Virgin Islands. The National Association of Insurance Commissioners’ (“NAIC”) Accounting Practices and Procedures Manual, (“NAIC SAP”), including the Statements of Statutory Accounting Principles (“SSAP”) as updated by the NAIC, have been adopted by the Oregon Insurance Division as a component of prescribed or permitted accounting practices under Oregon Insurance Division Bulletin INS 2007-5. B. Use of Estimates in the Preparation of the Financial Statements

There was no significant change in the use of estimates for the first six months of 2016.

C. Accounting Policy

- 6) Loan-backed and structured securities are carried at either amortized cost or the lower of amortized cost or fair value in accordance with the provisions of SSAP No. 43R – *Loan-backed and Structured Securities*. For loan-backed and structured securities, the effective yield is based on estimated cash flows, including prepayment assumptions based on data from widely accepted third-party data sources. Significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method.

2. ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

Accounting Changes

There were no accounting changes for the first six months of 2016.

Corrections of Errors

In the first quarter of 2016, the Company reclassified a net \$4.0 million of building improvements from nonadmitted furniture and equipment (page 2, line 21) into real estate (page 2, line 4). As a result of this reclassification, capital and surplus increased by \$4.0 million and was reflected on Summary of Operations, page 4, line 53 – aggregate write-ins for gains and losses in surplus with an offsetting decrease in capital and surplus reflected on page 4, line 41 – change in nonadmitted assets. There was no material impact on the Company’s financial position as a result of this reclassification.

STATEMENT AS OF JUNE 30, 2016 OF THE STANDARD INSURANCE COMPANY
NOTES TO FINANCIAL STATEMENTS

In December 2015, the Company incorrectly recorded \$2.0 million of federal low income housing tax credit investment losses as unrealized gains and losses (page 4, line 38) rather than net investment income (page 4, line 3). The correction of this error in the second quarter of 2016 resulted in a \$2.0 million decrease in net investment income as reported on Summary of Operations, page 4, line 3 and a \$2.0 million increase in capital and surplus as reported on Summary of Operations, page 4, line 53 – aggregate write-ins for gains and losses in surplus. There was no material impact on the Company’s financial position as a result of this correction.

3. BUSINESS COMBINATIONS AND GOODWILL

The Company was not a direct party to any business combinations and did not have any goodwill as of June 30, 2016. On March 7, 2016, the Company’s parent, StanCorp Financial Group, Inc. (“StanCorp”) was acquired by Meiji Yasuda Life Insurance Company (“Meiji Yasuda”). See Note #21 – Other Items for more information.

4. DISCONTINUED OPERATIONS

The Company did not have any discontinued operations.

5. INVESTMENTS

Commercial mortgage loans represented 40.5% and fixed maturity securities represented 56.4% of total cash and invested as of June 30, 2016.

The Company had net realized capital losses attributable to the disposal of fixed maturity securities of \$0.2 million for the first six months of 2016, compared to net realized capital gains of \$7.6 million for the first six months of 2015.

A. Mortgage Loans, including Mezzanine Real Estate Loans

The Company had net realized capital losses attributable to the disposal of commercial mortgage loans of \$4.4 million for the first six months of 2016, compared to \$1.5 million for the first six months of 2015.

B. Debt Restructuring

The Company held commercial mortgage loans in good standing with restructured terms of \$60.2 million and \$60.6 million as of June 30, 2016 and December 31, 2015, respectively.

C. Reverse Mortgages

The Company did not hold reverse mortgages as of June 30, 2016.

D. Loan-Backed Securities

(1) Prepayment assumptions for loan-backed and structured securities were obtained from independent pricing services or the Company’s third-party asset manager.

(2) a. The Company did not recognize any other-than-temporary impairments (“OTTI”) for loan-backed and structured securities on the basis of the intent to sell for the first six months of 2016.

b. The Company did not recognize any OTTI on the basis of the inability or lack of intent to hold the loan-backed and structured securities for a period of time sufficient to recover the amortized cost basis for the first six months of 2016.

(3) The Company did not recognize any OTTI on loan-backed and structured securities where the present value of cash flows expected to be collected was less than the amortized cost basis for the first six months of 2016.

(4) All impaired fixed maturity securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:

1. Less than 12 months	\$ 8,659,307
2. 12 months or longer	28,376,831

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 months	\$ 305,392,391
2. 12 months or longer	419,757,704

(5) The Company expects the fair value of the fixed maturity securities above to recover as the fixed maturity securities approach their maturity dates or sooner if market yields for such fixed maturity securities decline. The Company does not believe that any of the fixed maturity securities are impaired due to credit quality or due to any company or industry specific event. Based on the Company’s evaluation of the securities and intent to hold the securities, and as it is unlikely that the Company will be required to sell the securities, none of the unrealized losses summarized above are considered other-than-temporary.

E. Repurchase Agreements and/or Securities Lending Transactions

The Company did not have any repurchase agreements or securities lending transactions.

STATEMENT AS OF JUNE 30, 2016 OF THE STANDARD INSURANCE COMPANY

6. JOINT VENTURES, PARTNERSHIPS AND LIMITED LIABILITY COMPANIES

There was no significant change to joint ventures, partnerships and limited liability companies for the first six months of 2016.

7. INVESTMENT INCOME

There was no significant change in investment income for the first six months of 2016.

8. DERIVATIVE INSTRUMENTS

A. The Company is exposed to the credit worthiness of the institutions from which it purchases its S&P 500 Index options and these institutions' continued abilities to perform according to the terms of the contracts. The current values for the credit exposure have been affected by fluctuations in the S&P 500 Index. The Company's maximum credit risk exposure would require an increase of 4.7% in the value of the S&P 500 Index. The maximum credit risk is calculated using the cap strike price of the Company's S&P 500 Index options less the floor price, multiplied by the notional amount of the S&P 500 Index options.

As the Company uses a central counterparty ("CCP") to clear its interest rate swaps, the Company is only exposed to the default of the CCP. Transactions with the CCP require the Company to pledge initial and variation margin collateral. The Company has pledged cash and fixed maturity securities as collateral to the CCP. The Company maintains beneficial ownership of the collateral, which is classified as either cash, cash equivalents and short-term investments on Page 2, Line 5 or fixed maturity securities on Page 2, Line 1.

The following table sets forth collateral pledged to the CCP:

	Cash		Fixed maturity securities		Total	
	6/30/2016	12/31/2015	6/30/2016	12/31/2015	6/30/2016	12/31/2015

B. The Company sells indexed annuities, which permit the holder to allocate their deposit between a fixed interest rate return and an indexed return, where interest credited to the contracts is based on the performance of the S&P 500 Index, subject to an upper limit or cap and minimum guarantees. The index-based interest guarantees do not qualify for hedge accounting. Policyholders may elect to rebalance between interest crediting options at renewal dates annually. At each renewal date, the Company has the opportunity to re-price the indexed component by changing the cap, subject to minimum guarantees. The Company purchases S&P 500 Index options for its interest crediting strategy used in its indexed annuity product. These investments are highly correlated to the portfolio allocation decisions of its policyholders, such that the Company is economically hedged with respect to index-based interest rate guarantees for the current reset period.

The Company uses interest rate swaps to reduce risks from changes in interest rates, to manage interest rate exposures arising from asset and liability mismatches, to protect against variability in future cash flows, and to protect the value of the Company's investments. By means of these contracts, the Company agrees with a counterparty to exchange, at specified intervals, the difference between fixed rate and floating rate interest amounts as calculated by reference to agreed notional amounts.

C. The Company designates and accounts for fair value hedges under hedge accounting when they have met the criteria requirements of SSAP No. 86, *Accounting for Derivative Instruments and Hedging, Income Generation, and Replication (Synthetic Asset) Transactions* ("SSAP 86"). To qualify for hedge accounting under SSAP 86, at the inception of the hedge, the Company documents its risk management objective and strategy for undertaking the hedging transaction, as well as its designation of the hedge as either: (i) a hedge of the estimated fair value of a recognized asset or liability ("fair value hedge"); or (ii) a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to the recognized asset or liability ("cash flow hedge"). A derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is assessed at inception and throughout the life of the hedging relationship. In hedge transactions which qualify for hedge accounting, the change in the carrying value of the derivative is recorded in a manner consistent with the changes in the carrying value of the hedged item. In measuring effectiveness, no component of the derivative's gain or loss is excluded. Upon termination of a derivative that qualified for hedge accounting, the gain or loss is reflected as an adjustment to the basis of the hedged item and is recognized in income consistent with the hedged item.

If the Company chooses to not designate its derivatives for hedge accounting or designated derivatives no longer meet the criteria of an effective hedge, the changes in the fair value of the derivatives are included in "Change in net unrealized capital gains (losses)" without considering changes in the fair value of the hedged item. Accruals of interest income, expense and related cash flows on interest rate swaps are reported in "Net investment income". Upon termination of a derivative that does not qualify for hedge accounting, the gain or loss is included in "Net realized capital gains (losses)". In addition, when realized gains or losses on interest-rate related derivatives are recognized, they are amortized through the interest maintenance reserve.

D. The Company's net unrealized capital gains from derivatives excluded from the assessment of hedge effectiveness were \$1.1 million and \$1.6 million as of June 30, 2016 and 2015, respectively.

NOTES TO FINANCIAL STATEMENTS

- E. The Company's derivatives that originally were designated for hedge accounting still qualified for hedge accounting as of June 30, 2016. Therefore, the Company did not recognize any unrealized gains or losses for the first six months of 2016 related to derivatives that no longer qualify for hedge accounting.
- F. In the second quarter of 2015, the Company entered into interest rate swaps of \$252.9 million with external counterparties to mitigate interest rate risk exposure to overall changes in the future cash flows associated with StanCorp's junior subordinated debentures from June 1, 2017 through June 1, 2042. The Company entered into intercompany interest rate swaps with StanCorp for \$252.9 million with offsetting terms as the external interest rate swaps to effectively transfer the economic risk to StanCorp. These interest rate swaps do not qualify for hedge accounting for the Company and as such the changes in fair value of the external and intercompany interest rate swaps are recorded in unrealized capital gains (losses) and reported in derivative assets and liabilities. The fair value of the interest rate swaps resulted in \$35.7 million of derivative assets and liabilities as of June 30, 2016.

In the second quarter of 2015, the Company completed the purchase of \$115.0 million of par value of fixed maturity securities that were part of an anticipated bond purchase cash flow hedge strategy. The completion of this strategy resulted in \$9.7 million of losses that were recorded as realized capital losses. These realized capital losses, net of tax, are to be amortized into income through the interest maintenance reserve.

(3) The Company recognizes transfers between fair value levels at the end of the reporting period.

(4) Valuation techniques and inputs used in the fair value measurement for assets and liabilities.

Assets and liabilities recorded at fair value are disclosed using a three-level hierarchy. The classification of assets and liabilities within the hierarchy is based on whether the inputs to the valuation methodology used for measurement are observable or unobservable. Observable inputs reflect market-derived or market-based information obtained from independent sources while unobservable inputs reflect the Company's estimates about market data.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels: Level 1 inputs are based upon quoted prices in active markets for identical assets or liabilities that the Company can access at the measurement date. Level 2 inputs are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market. Level 3 inputs are generated from model-based techniques that use significant assumptions not observable in the market. These unobservable

STATEMENT AS OF JUNE 30, 2016 OF THE STANDARD INSURANCE COMPANY
NOTES TO FINANCIAL STATEMENTS

assumptions reflect the Company's estimates of assumptions that market participants would use in pricing the asset or liability.

There are three types of valuation techniques used to measure assets and liabilities recorded at fair value:

- The market approach, which uses prices or other relevant information generated by market transactions involving identical or comparable assets or liabilities.
- The income approach, which uses the present value of cash flows or earnings.
- The cost approach, which uses replacement costs more readily adaptable for valuing physical assets.

The Company uses both the market and income approach in its fair value measurements. These measurements are discussed in more detail below.

Fixed Maturity Securities

Fixed maturity securities are comprised of the following classes:

- U.S. government.
- U.S. states, territories and possessions.
- U.S. special revenues.
- Industrial and miscellaneous (unaffiliated).

The fixed maturity securities are diversified across industries, issuers and maturities. The Company calculates fair values for all classes of fixed maturity securities using valuation techniques described below. They are placed into three levels depending on the valuation technique used to determine the fair value of the securities.

The Company uses independent pricing services to assist management in determining the fair value of these assets. The pricing services incorporate a variety of information observable in the market in its valuation techniques, including:

- Reported trading prices.
- Benchmark yields.
- Broker-dealer quotes.
- Benchmark securities.
- Bids and offers.
- Credit ratings.
- Relative credit information.
- Other reference data.

The pricing services also take into account perceived market movements and sector news, as well as a fixed maturity securities terms and conditions, including any features specific to that issue that may influence risk, and thus marketability. Depending on the security, the priority of the use of observable market inputs may change as some observable market inputs may not be relevant or additional inputs may be necessary.

The pricing services provide quoted market prices when available. Quoted prices are not always available due to fixed maturity securities market inactivity. The pricing services obtain a broker quote when sufficient information, such as security structure or other market information, is not available to produce a valuation. Valuations and quotes obtained from third party commercial pricing services are non-binding and do not represent quotes on which one may execute the disposition of the assets.

The significant unobservable inputs used in the fair value measurement of the reporting entity's fixed maturity securities are valuations and quotes received from analytical reviews and broker quotes. Significant increases or decreases in any of those inputs in isolation would result in a significantly lower or higher fair value measurement. Generally, a change in the assumption used for the pricing evaluation is accompanied by a directionally similar change in the assumption used for the methodologies.

The Company performs control procedures over the external valuations at least quarterly through a combination of procedures that include an evaluation of methodologies used by the pricing services, analytical reviews and performance analysis of the prices against statistics, trends and other pricing sources, back testing of sales activity and maintenance of a list of fixed maturity securities with characteristics that could indicate potential impairment. As necessary, the Company compares prices received from the pricing services to prices independently estimated by the Company utilizing discounted cash flow models or through performing independent valuations of inputs and assumptions similar to those used by the pricing service in order to ensure prices represent a reasonable estimate of fair value. Although the Company does identify differences from time to time as a result of these validation procedures, the Company did not make any significant adjustments as of June 30, 2016 or December 31, 2015.

The fair values for fixed maturity securities with a designated class of other than class 6 or 6FE that had other-than-temporary impairment were valued using Level 2 measurements. The Company principally uses the market and income approaches to measure these financial instruments at fair value. The Level 3 fixed maturity securities were valued using matrix pricing, independent broker quotes and other standard market valuation methodologies.

Commercial Mortgage Loans

For disclosure purposes, the fair values of commercial mortgage loans were estimated using a discounted cash flow valuation. The valuation includes both observable market inputs and estimated model parameters.

Significant observable inputs to the valuation include:

- Pricing for loans originated by StanCorp Mortgage Investors during the most recent quarter.
- U.S. Government treasury yields.
- The contractual terms of nearly every mortgage loan subject to valuation.

STATEMENT AS OF JUNE 30, 2016 OF THE STANDARD INSURANCE COMPANY
NOTES TO FINANCIAL STATEMENTS

Significant estimated parameters include:

- The use of risk characteristics including stabilized debt coverage ratio and loan-to-value ratio.
- Variations in valuation spread between loans based on individual risk characteristics.

Valuations for commercial mortgage loans measured at fair value on a nonrecurring basis using significant unobservable Level 3 inputs are sensitive to a number of variables, but are most sensitive to net operating income and the applied capitalization rate. Generally, an increase or decrease resulting from a change in the stabilized net operating income from the collateralized property would result in a directionally similar change in the fair value of the asset. An increase or decrease in the assumption for the capitalization rate would result in a directionally opposite change in the fair value of the asset.

S&P 500 Index options

S&P 500 Index options were valued using Level 3 inputs. The fair value was determined using inputs that were not observable or could not be derived principally from, or corroborated by, observable market data. These inputs included assumptions regarding liquidity, estimated future cash flows and discount rates. Unobservable inputs to these valuations are based on management's judgment or estimation obtained from the best sources available. The Company's valuations maximize the use of observable inputs, which include an analysis of securities in similar sectors with comparable maturity dates and bond ratings. Broker quotes are validated by management for reasonableness in conjunction with information obtained from matrix pricing and other sources.

The Company calculates the fair value for its S&P 500 Index options using the Black-Scholes option pricing model and parameters derived from market sources. The Company's valuations maximize the use of observable inputs, which include direct price quotes from the Chicago Board Options Exchange ("CBOE") and values for on-the-run treasury securities and London Interbank Offered Rate as reported by Bloomberg. Unobservable inputs are estimated from the best sources available to the Company and include estimates of future gross dividends to be paid on the stocks underlying the S&P 500 Index, estimates of quoted market prices and the spread between the bid and ask prices, and estimates of implied volatilities on options. Valuation parameters are calibrated to replicate the actual end-of-day market quotes for options trading on the CBOE. The Company performs additional validation procedures such as the daily observation of market activity and conditions and the tracking and analyzing of actual quotes provided by banking counterparties each time the Company purchases options from them. Additionally, in order to help validate the values derived through the procedures noted above, the Company obtains indicators of value from representative investment banks.

While valuations for the S&P 500 Index options are sensitive to a number of variables, valuations for S&P 500 Index options purchased are most sensitive to changes in the estimates of bid ask spreads, or the S&P 500 Index value, and the implied volatilities of this index. Significant fluctuations in any of those inputs in isolation would result in a significantly lower or higher fair value measurement. Generally, an increase or decrease used in the assumption for the implied volatilities and in the S&P 500 Index value would result in a directionally similar change in the fair value of the asset.

Separate Account Assets

Separate account assets represent segregated funds held for the exclusive benefit of contract holders. The activities of the account primarily relate to participant-directed 401(k) contracts. Separate account assets are recorded at fair value on a recurring basis, with changes in fair value recorded to separate account liabilities. Separate account assets consist of mutual funds. The mutual funds' fair value is determined through Level 1 and Level 2 inputs. The majority of the separate account assets are valued using quoted prices in an active market with the remainder of the assets valued using quoted prices from an independent pricing service. The Company reviews the values obtained from the pricing service for reasonableness through analytical procedures and performance reviews.

Index-based Interest Guarantees

The Company uses the income approach valuation technique to determine the fair value of index-based interest guarantees. The liability is the present value of future cash flows attributable to the projected index growth in excess of cash flows driven by fixed interest rate guarantees for the indexed annuity product. Level 3 assumptions for policyholder behavior and future index crediting rate declarations significantly influence the calculation. Index-based interest guarantees are included in aggregate reserves on the Company's liabilities, surplus and other funds.

Valuations for the index-based interest guarantees are sensitive to a number of variables, but are most sensitive to the S&P 500 Index value, the implied volatilities of this index and the interest rate environment. Generally, a significant increase or decrease used in the assumption for the implied volatilities and in the S&P 500 Index value would result in a directionally similar change, while an increase or decrease in the interest rate environment would result in a directionally opposite change in the fair value of the liability.

Interest Rate Swaps

Interest rate swaps are used in hedging relationships and are recorded in a manner that is consistent with the hedged item. The estimated fair value of the interest rate swaps is determined through a pricing model. The interest rate swaps qualify as Level 2 under the fair value hierarchy since their valuation is based on a model for which all significant assumptions are observable in the market.

(5) Fair value measurements of derivative assets and liabilities as of June 30, 2016 are included in 20.A.(1) and 20.A.(2).
